1. System Overview

CrosCal Fitness is a web-based gym management system that handles member registration, memberships, attendance (QR-based check-in), coach-client assignments, workout & meal plans, payments, and analytics. It is a Next.js application that runs on `http://localhost:3000` in development.

KEY FEATURES

- Role-based dashboards for Admin, Coach, and Client
- Admin approval workflow for new client registrations
- Membership plans (Basic / Premium) and renewals
- QR-code attendance: client shows QR, coach/admin scans
- Workout library, goals tracking, and meal plans
- Coach assignment per client, with personalised plans
- Real-time analytics for revenue and attendance

Default Demo Accounts

ROLE	EMAIL	PASSWORD	LANDS ON
Admin	<code>admin@crosca1.local</code>	<code>admin123</code>	<code>/admin/analytics</code>
Coach	<code>coach@crosca1.local</code>	<code>coach123</code>	<code>/coach/dashboard</code>
Client	<code>client@crosca1.local</code>	<code>client123</code>	<code>/client/dashboard</code>

2. Roles & Permissions

ADMIN

COACH

CLIENT

THE OWNER

Approves accounts and runs the gym.

- Approve / reject sign-ups
- Manage memberships & pricing
- Assign coaches to clients
- Record payments & renewals
- Manage workouts & equipment
- View revenue / attendance analytics

THE TRAINER

Guides their assigned clients.

- See assigned clients
- Create / manage session schedules
- Set workout & nutrition plans
- Scan client QR to check them in
- Track client progress

THE MEMBER

Trains and tracks progress.

- Buy / renew membership
- Check in via personal QR
- View workouts & meal plan
- Track goals & attendance
- View payment history

3. End-to-End Navigation Flow

The diagram below shows the full path users take through CrosCal — from the very first visit on [/](#) to logging out. Routes are protected by middleware: a user can only enter the area that matches their role.

A. ENTRY & AUTHENTICATION

B. ROLE-BASED ROUTING (AFTER LOGIN)

C. CLIENT DAY-TO-DAY FLOW

D. COACH DAILY FLOW

E. ADMIN OPERATIONAL FLOW

F. EXIT

4. Getting Started (First-Time Setup)

Use this once to bring the system online on a fresh machine.

1 Install dependencies

Open a terminal in the project folder and run `npm install`.

2 Configure environment

Set `DATABASE_URL` and `NEXTAUTH_SECRET` in the `.env` file.

3 Apply database schema

Run `npm run migrate` (uses Prisma). Then `npm run generate`.

4 Seed demo data

Run `npm run seed`. This creates the admin / coach / client demo accounts.

5 Start the server

Run `npm run dev` and open `http://localhost:3000` in your browser.

6 Sign in

You will be redirected to `/auth/sign-in`. Use the demo credentials in §1.

5. Step-by-Step: Client Workflow

This is the journey of a member from the moment they discover the gym to a fully active training routine.

5.1 Register an Account

1 Open the sign-in page `/auth/sign-in`

Click **“Register as a client”** at the bottom of the form.

2 Fill the registration form `/auth/register`

Enter **name**, **email**, **password**, plus optional personal info (phone, date of birth, gender, occupation, address pinned on the map, emergency contact, and fitness notes).

3 Submit and wait for approval

The account is created with **INACTIVE** status. The admin must approve it before you can sign in. You'll see a green confirmation banner.

5.2 First Login & Buy a Membership

4 Sign in `/auth/sign-in`

Use your registered email and password. You land on the **Client Dashboard**.

5 View dashboard `/client/dashboard`

The dashboard shows: **current membership**, **check-ins this month**, **goal progress**, attendance chart, today's workout, and your personal **QR code**. With no membership yet, most cards show “—”.

6 Choose a membership plan `/client/memberships`

Use the sidebar → **Memberships**. Pick **Basic** or **Premium** (Premium includes a coach). Submit to request enrolment.

7 Pay at the front desk `/client/payments`

Payment is recorded by the admin. Track its status under **Payments**. Once the admin marks payment *completed*, your membership becomes **ACTIVE**.

5.3 Daily Use — Check-in & Train

8 Check in at the gym `/client/dashboard`

Scroll to the **My QR code** card. Show it to the coach/admin at the entrance. They scan it and your attendance is logged automatically. Alternatively, open **Schedules**, click a session, then press *Check in*.

9 Follow today's workout `/client/workouts`

Use the **Workout player** on the dashboard or open the **Workouts** page to see your assigned routines step-by-step.

10 Track goals `/client/goals`

Open **Goals** from the sidebar to update progress on assigned goals. Completed goals raise the "goals" counter on your dashboard.

11 Follow the meal plan `/client/meal-plan`

If you have a coach (Premium), your daily calorie / protein targets and weekly nutrition advice appear here and on the dashboard's **"Your coach's plan"** card.

12 View schedule & attendance `/client/schedules · /client/attendance`

See upcoming gym sessions in **Schedules**, and your historical check-ins under **Attendance**.

Note: Without an active membership, the sidebar hides Goals, Meal Plan, Schedules and Attendance. Buying or renewing a membership re-enables them.

6. Step-by-Step: Coach Workflow

1 Sign in `/auth/sign-in`

Coach is auto-redirected to `/coach/dashboard`.

2 Review the dashboard `/coach/dashboard`

See total **assigned clients**, **today's sessions**, plus sessions and attendance charts for the last 4 weeks.

3 Open My Clients `/coach/clients`

Browse the clients assigned to you. Click a client to view profile, history, and set their plan (nutrition objective, daily calories, protein, weekly gym sessions, schedule notes).

4 Manage schedules `/coach/schedules`

Create or edit upcoming sessions for your clients on the calendar. Each session appears on the client's **Schedules** page.

5 Check a client in

On a session's details, open the **QR scanner**. Point the camera at the client's QR code (shown on their dashboard). Attendance is saved instantly.

6 Log out

Sidebar → user avatar (bottom-left) → **Log out**.

7. Step-by-Step: Admin Workflow

7.1 Daily Operations

1 Sign in as admin `/auth/sign-in`

Auto-redirects to `/admin/analytics`.

2 Check analytics `/admin/analytics`

Review KPIs: **Total Members**, **Active Memberships**, **Today's Attendance**, and **Revenue This Month**, plus attendance (14 days) and revenue (6 months) charts.

3 Approve new sign-ups `/admin/accounts`

Switch to the **Pending** tab. For each row, click the green checkmark to activate the account, or the ban icon to reject. You can also create or edit Admin / Coach accounts from this screen.

4 Maintain membership plans `/admin/memberships`

Add, edit, or archive membership plans (name, type, price, duration). These plans appear to clients on their Memberships page.

5 Sell a membership to a client `/admin/client-memberships`

Pick the client, pick a plan, set the start date. The client immediately sees the active membership on their dashboard.

6 Assign a coach `/admin/coach-assignments`

For Premium members, attach a coach. This unlocks the **"From your coach"** card on the client dashboard and gives the coach access to that client.

7 Record a payment `/admin/payments`

Add a payment for a client (cash / card / transfer) and mark it **COMPLETED**. The membership becomes active and revenue charts update.

8 Handle renewals `/admin/renewals`

See memberships that are expiring soon. Process renewal & payment in one click.

7.2 Schedules & Attendance

9 Open Schedules `/admin/schedules`

Master calendar of every coach session and class. Add, edit, reschedule, or cancel sessions.

10 Open Attendance `/admin/attendance`

Live feed of all check-ins. Use the QR scanner here for walk-in check-ins.

7.3 Library & Inventory

11 Manage workouts `/admin/workouts`

Create workout templates with exercises, sets and reps. Coaches assign these to clients.

12 Manage goals `/admin/goals` · `/admin/client-goals`

Define reusable workout goals, then attach them to clients under **Client Goals**.

13 Track equipment `/admin/equipment`

Add machines, weights and accessories with availability status.

8. Common Tasks Reference

TASK	ROLE	WHERE TO GO
Approve a new client	Admin	Sidebar → Accounts → <i>Pending</i> tab → ✓
Sell a membership	Admin	Sidebar → Client Memberships → New
Assign a coach	Admin	Sidebar → Coach Assignments → New
Record a payment	Admin	Sidebar → Payments → Add
Renew a membership	Admin	Sidebar → Renewals → Renew
Set a client's meal plan	Coach	Sidebar → My Clients → client → Plan
Create a session	Coach/Admin	Sidebar → Schedules → New
Check a client in	Coach/Admin	Schedule → session → QR scan
Buy a membership	Client	Sidebar → Memberships → Subscribe
Check in (self)	Client	Dashboard → show QR code
See workout	Client	Dashboard → Today's workout
Update goal progress	Client	Sidebar → Goals → row → Update

9. Logout & Session Handling

- Logout is in the **bottom-left of every page**: click your avatar → **Log out**.
- You are returned to `/auth/sign-in`.
- Sessions are JWT-based; sign out from one tab signs out all tabs once they refresh.
- Visiting another role's URL while logged in (e.g. a coach opening `/admin/*`) immediately redirects to `/auth/sign-in`.

10. Troubleshooting

SYMPTOM	CAUSE	FIX
"Invalid email or password" after registering	Account is still INACTIVE ; admin has not approved you.	Ask an admin to open <code>/admin/accounts</code> → Pending → Approve.
Goals / Meal plan / Schedules missing from client sidebar	No active membership.	Admin records a paid membership, or client purchases & admin confirms payment.
QR scan doesn't check in	Client has no membership, or session belongs to a different coach.	Verify membership is ACTIVE and the coach is assigned.
Admin can't see revenue	No payments recorded with status COMPLETED .	Open <code>/admin/payments</code> and mark payments completed.

SYMPTOM	CAUSE	FIX
Redirect loop to /auth/sign-in	Session expired or wrong role for that URL.	Sign in again with the correct role's credentials.

You're done. Follow the same flow each visit: *sign in* → *land on dashboard* → *use sidebar to navigate* → *log out*. That is the entire end-to-end navigation of the system.
